Cambridge Employees Presented With Industry Leadership Award

Cambridge, MD – **Angela Visintainer** and **Dion Banks** of **Cambridge Environmental Technologies** were honored as joint recipients of the **Industry Leadership Award**, presented by the **Maryland Clean Energy Center** (MCEC), for their efforts in the field of biomass energy at the **2012 Maryland Clean Energy Summit**, held Sept. 18.

Annually, the MCEC selects individuals, companies, and organizations that are committed to advancing clean energy, energy efficiency, and job creation in the state of Maryland. These distinguished selectees are rewarded for their endeavors through partnerships, advocacy, entrepreneurship, and leadership.

“It’s such an honor to receive this award when there are so many people working tirelessly to advance Maryland’s clean energy economy,” says Angela Visintainer. “I’m excited to keep building on the great momentum we have going, and I can’t wait to see how far we’ve come by this time next year.”

The awards were presented by Kathy Magruder, Executive Director of MCEC, Abigail Hopper, Energy Advisor to Gov. Martin O’Malley, and Calvin Butler, Director of Government Relations for Exelon Corporation.

“Maryland is aggressively working towards a cleaner and more reliable energy future,” says Dion Banks. “Cambridge Environmental Technologies is proud to be a part of this movement which will lead to energy independence, a cleaner environment and job creation.”

###

About MCEC

The Maryland Clean Energy Center was created in 2008 to encourage the transformation of the energy economy with programs that catalyze the growth of business, increase related “green collar” jobs, and make clean energy technologies, products and services affordable, accessible, and easy to implement for Maryland residents. Learn more about MCEC at mdcleanenergy.org.

About CET

CET is an innovative U.S.-based engineering and manufacturing company specializing in systems design, material handling and filtration. Our multidisciplinary industrial design and engineering team provides expertise in game-changing process solutions, drawing on a century of experience and innovation from its parent company Cambridge International.
